- For this we could search for people already in China and offer them a salary per hour (paid weekly).
- Give them a little course about how this job should be done.-
- We need to make a contract in a way that prevents the family and the student to make their own agreement.
- We could have the possibility off being the ones paying the salary or let this to the family but that for sure is going to change how much we charge the family.
- The goal of this program is to be more basic and with a better price so that could be available for common Chinese families and we could expand our clients and our businesses)

For this one we could bring foreigners that are not in China for a short period with different rules as the original program. the foreigner must pay their own flight ticket. as they are staying with the family they would work a little more and also receive less pocket money

(the goal of this program is to be more basic and with a better price so that could available for common Chinese families and we could expand our clients and our businesses).

This program is really similar to the short period one but the duties, work time and money are different.

# AU PAIR SHORT TERM

1-4 Months

Price for the families to be agreed

1500 Pocket Money

Same duties and rules as the 6 months program

Only XMANDARIN classes available

As we know some families are not really sure about the program so this is a good chance to have a try. Also has a lot of Au pairs that want to come to China for just 1-3 months.

as this program is very short we will not provide the flight ticket.

We could also think about the possibility to maybe provide an place to the au pair stay if the family is not willing or can not host them.

For the Au pairs that the during the program were great we can offer a part of the way back plane ticket.
